SIZING SUGGESTIONS + HELPFUL HINTS

- Measure your dancer while they are wearing a leotard for the most accurate measurements.
- When trying to decide which sizes to order, **girth should be the most important measurement.**
- XLC and XXLC sizes are made to fit a larger child, not a petite adult.

SIZING TIPS + TRICKS

Girth is the most important measurement!

GIRTH

Measure from the center of one shoulder, down through crotch, and back up to same shoulder

BUST

Measure around fullest part of the bust

WAIST

Measure around natural waist

HIPS

Measure around widest part of the hips

How To Measure Dancers

Have dancers wear fitted attire (preferably a leotard—no street clothes!) with proper undergarments in order to ensure the most accurate measurements.

When measuring, instruct dancers to stand up straight, look forward, and take a deep breath in & out to allow for a natural fit and additional room. This is especially important when taking the girth, bust, and waist measurements.

- **Girth** - Girth is the most important measurement when determining size on one piece garments.
Have your dancers wear undergarments or a lightweight leotard with a bra that gives the bust line its typical shape for most accurate measurements.
- **Bust** - Measure around the fullest part of the chest, keeping the tape horizontal, and have dancers stand with arms down at their sides.
- **Waist** - To identify the natural waistline, instruct dancers to bend over to one side and have the measurer place a finger at the indentation. As the dancers stand up, use this point as the indicator for where to measure around the waist.
- **Hips** - Have dancers stand with their feet together and measure around the fullest part of the buttocks.
- **Inseam** - Place the measuring tape at the inner leg, measuring from the crotch all the way to the floor.
